

Cut, carry or windrow material forward or backward with double acting wings & rear blade

Folding wing offers the material containment of a box blade

**No grease
All linkages are sealed for life**

Retracting front chassis for reduced transport length

Best in class visibility of the cutting edge

- 1** Viewing windows on hitch plate offer industry leading visibility to the rear cutting edge
- 2** High performance proportional valves compatible with all skid-steer manufacturers hydraulic systems
- 3** Outboard mounted cylinders reduce cross coupling to a minimum
- 4** Galvanized anti-vibration receiver poles with elevation reference
- 5** Robust, narrow boxed chassis for unsurpassed visibility
- 6** Retracting front chassis for legal transport across your trailer to save valuable deck space
- 7** Underslung walking beam reduces wheel scuff while turning
- 8** Twin large, outboard parabolic mirrors
- 9** HardiLube grease free bushings throughout
- 10** Labyrinth seals on wheel bearings keep grit out
- 11** Heavy duty reversible side wings to carry material either direction
- 12** Pivoting rear blade: grades forward or reverse
- 13** Angle cylinders mounted above material
- 14** Sealed, shielded & lifetime lubricated joints throughout, never require greasing
- 15** Adjustable height hitch plate
