

MAO-6HC & PAC Smart Control

Filter Pressurisation System suitable for mounting on the cabin roof

The streamlined design and modest dimensions make the BMAir MAO-6HC extremely suitable for mounting on the cabin roof. Nevertheless, the compactness of the system does not come at the expense of its capacity.

The MAO-6HC comes standard with the new PAC Smart Control. All data can be read clearly on the 3.5' high resolution LCD display. With fully automatic filter communication and intuitive operation, the operator can easily send all relevant information via QR code with their own smartphone to the safety manager, project manager or employer. Filter types, serial numbers and events are continuously monitored and securely stored in the standard datalogging module. The PAC Smart Control is IoT ready, which also allows real-time data transfer.

The BMAir control system regulates the pressure in the cabin automatically and has patented filter recognition. The display of the system indicates when the Combifilter

needs to be replaced. With the exception of replacing the filters, the system is completely maintenance free.

Naturally, the filtering function of all systems and filters are tested in an external laboratory. In addition, we comply with the EMC guidelines; these tests are carried out independently.

With the new generation of BMAir products, you can manage your supply of filtered cabin air without difficulty or worry!

BMAIR
clean cabin air

MAO-6HC

Streamlined design for mounting on the roof

High efficiency and capacity

Longlife brushless digital fan motor

Filter information and hour readings through proven RFID

Extra filters for specific sectors can be added to the system

Maintenance free

PAC Smart Control

Easy to install high-quality sensitivity air quality sensor

IoT ready, prepared for the real-time future

Easy operation

Maximum security through integrated data logging

Easy to read colour screen with automatic day, night mode

Maintenance messages with QR code generator

Wide data possibilities through digital Rx / Tx connection

Easily order filters

Forward system information and events

MAO-6HC Combi Filters

Dust combination:	Type	Art. nr.
Asbestos Toxic particulate matter, asbestos silica dust and heavy metals. Efficiency > 99.95%	P3/H13	124720HC
Active carbon combinations:	Type	Art. nr.
Benzene Vapours from solvents and hydrocarbons (e.g. diesel)	P3-A	124710HC
Dredging Vapours from dredging spoil such as bacteria, toxic particulate matter, heavy metals and H ₂ S	P3-ABE	124740HC
ABE/K Vapours such as H ₂ S and ammonia. (caution: not for use with cyanides such as HCN)	P3-ABE/K	124745HC
ABEK Vapours from cocktail of toxic substances. In accordance with EN14387	P3-ABEK	124750HC
Ammonia/Organic waste Vapours from waste and composting such as spores, bacteria, viruses, organic and ammonia	P3-A/K	124760HC
AX Vapours from solvents and hydrocarbons with boilingpoint < 65°C	P3-AX	124770HC

Facilitating health is our goal

For 25 years, our goal has been to provide them with the cleanest air possible at all times, every minute and every second of their workday. We never compromise when it comes to breathing air; after all, it is our human right.

The integrity of us as an organisation depends on the quality of our products. Therefore, it is of the

utmost importance that our pressurised filter systems are of the highest standard. Only then can we achieve our goals: "the cleanest air possible for every machine operator who works in a polluted (mobile) work environment".

As the market leader in the pressurised filter systems market, we are getting closer to our objective

every day. Many operators are already working with our pressurised filter systems.

Yet, there is still a long way to go. Too many employers, commissioning parties and machine operators can be light-hearted about the long term health risks. A good protection should be common practice.

Clean air in your cabin is of vital importance!
